Rick Wang

rickwang121@gmail.com rick-wang-nz nagahole

Education

University of Sydney *Dec 2025*
Bachelor of Computing (Computer Science) · Cybersecurity Minor

- **WAM:** 86.6 (HD) · **ATAR:** 99.95
- **Awards:** GS Caird Scholarship in CS · Academic Merit Prize · Dean's List (Y1 & Y2) · UG High Honour Roll Chancellor's Award · Dalyell Scholar
- **Activities:** Mentoring Subcommittee, Sydney Competitive Programming Club · Tech Subcommittee, Chopsticks

Experience

Software Engineer *San Francisco, CA*
Strala · Series A AI insurance startup *Oct 2026 – Present*

- Build full-stack features end to end, from scoping with operations to production (Python, React/TypeScript, GCP, Terraform, Docker)

Software Engineer Intern *Hong Kong*
Jane Street *Dec 2025 – Feb 2026*

- Built OCaml RPC servers to split large jobs into shards and distribute them across workers
- Presented the sharding design and implementation at internal tech talks to engineers across teams

University Tutor *Sydney*
University of Sydney *Feb 2025 – Jul 2025*

- Ran weekly tutorials for COMP2017 (Systems Programming in C) and COMP3221 (Distributed Systems)
- Taught memory management, concurrency, networking, and consensus protocols

Freelance Web Developer *Remote*
SoleAgents *Jan 2025 – Present*

- Built and maintain a client's *real estate website*, with property search, mailing lists, and enquiry forms

Software Developer *Sydney*
University of Sydney *Mar 2024 – Dec 2024*

- Built chemistry lab simulations in C# and Unity with biochemistry staff for online lab classes
- Modelled how pH, volume, and concentration change during liquid transfers, shown in real-time 3D

Projects

ITCH Feed Handler · *C++20* *In progress · github*

- Learning C++ by building a parser and limit order book for Nasdaq ITCH 5.0 market data, tested under sanitizers

Byte Blasters · *Roguelike Shooter (C#, Unity)* *SXSW Sydney 2024 · github*

- Built solo in 10 weeks: 16k lines of C#, with modular weapons, node-graph enemy AI, and a GPU compute shader for fog of war
- Prototyped a dungeon generator connecting rooms via Delaunay triangulation and a minimum spanning tree, later moved to a graph-based layout library

PocketWise · *Mobile Finance Tracker* *github*

- Built and published a budgeting app on the App Store (live Feb 2023 – Feb 2024), with Google & Apple sign-in, real-time sync, and spending analytics (React Native, Firebase)

Skills

- **Languages:** Python, C, C#, Java, TypeScript, OCaml, C++ (learning)
- **Tools:** Git, Linux, Docker, GCP, Terraform, Unity, React Native, Firebase
- **Systems:** Concurrency, parallelism, distributed systems, networking, memory management
- **Interests:** Speedcubing (17s average) · Boxing · Powerlifting
