Education

University of Sydney

Bachelor of Advanced Computing — CS Major · Cybersecurity Minor

*Expected Dec 2025
(Honours optional 2026)*

- **1st Year Average:** 91.7 — **2nd Year Average:** 87.6 — **3rd Year Average:** 80.6
- **Honours & Awards:** GS Caird Scholarship in Computer Science · Chancellor's Award · Dean's List (1st & 2nd Year) · UG High Honour Roll · Academic Merit Prize · Dalyell Scholars Stream
- **ATAR:** 99.95

Technical Skills

- **Languages:** OCaml, C, Python, C#, JavaScript, Java
- **Systems & Concepts:** RPC architectures, multithreading, synchronization, distributed systems, networking, parallelisation
- **Frameworks/Tools:** React Native, Firebase, Unity, WordPress
- **Practices:** Code review, testing pipelines, production reliability standards

Experience

Software Engineer Intern

Jane Street

*Hong Kong
Dec 2025 – Feb 2026*

- Developed backend systems in OCaml, including RPC servers within a latency-sensitive trading infrastructure
- Contributed to a parallelisation initiative to improve internal computational throughput
- Worked within strict code review, testing, and reliability standards for latency-sensitive systems
- Presented architectural decisions and implementation details in internal workshops and technical forums

Tutor

University of Sydney

*Sydney
Feb 2025 – July 2025*

- Delivered weekly tutorials for COMP2017 (Systems Programming in C) and COMP3221 (Distributed Systems), reinforcing core systems and concurrency concepts
- Taught memory management, low-level addressing, threading, synchronization, routing, consensus protocols, and blockchain security

Web Developer

SoleAgents

*Remote
Jan 2025 – Present*

- Designed and deployed a [WordPress-based real estate platform](#) with subscription mailing lists, dynamic property filtering, and automated inquiry routing
- Managed client requirements and translated operational needs into technical solutions

Software Developer

University of Sydney

*Sydney
Mar 2024 – Dec 2024*

- Collaborated with biochemistry faculty to build interactive chemistry experiment simulations as an online lab alternative in C#
- Implemented a liquid transfer system modelling pH, volume, and concentration changes
- Developed real-time 3D visual feedback using the Unity engine

Projects

PocketWise - Mobile Finance Tracker

[github](#) → [🔗](#)

- Built a budget-tracking app with Google & Apple SSO authentication and real-time persistence
- Implemented spending trend analytics
- Stack: React Native (frontend), Firebase Firestore (backend)
